

Titahi Bay donates hand water pumps to Pakistan

Something we in New Zealand do not think about is that clean water is not available to everyone in all other countries. In Pakistan, there are places where the local people struggle with the thoughts of getting clean water for their families.

Melvin Jones fellow Peter B Snow, raised to our attention the need for some hand water pumps for villages in Pakistan. This pump pictured below is one of three pumps donated by Titahi Bay Lions with signs of the support from our club.

As the Pakistan rupee weakened in value against the US dollar in the time that the funds were waiting to be spent, the NZ\$420.00 donated brought three pumps instead of the two pumps originally expected.

Thanks again to Peter for the opportunity for Lions to help those in need.
